

Montana Department of Natural Resources and Conservation  
Water Resources Division  
Water Rights Bureau

**ENVIRONMENTAL ASSESSMENT**  
**For Routine Actions with Limited Environmental Impact**

**Part I. Proposed Action Description**

1. Applicant/Contact name and address: **Evers Ranch Company  
205 Avenue D  
Billings MT 59101**
2. Type of action **Application To Change An Existing Water Right No. 41S 30108095**
3. Water source name: **Groundwater**
4. Location affected by project: **The project is located in Fergus County, MT**
5. Narrative summary of the proposed project, purpose, action to be taken, and benefits:

**Proposed change is to add seven stock tanks to an existing system (Statement of Claim 41S 132042). The point of diversion is a well (Morris Well) with a submersible ¾ HP, 220 volt pump, measured with flow rate of 8 GPM. The point of diversion is located in the SENESE of section 2, T21N, R15E of Fergus County. The pump diverts water through a 1.5 inch, schedule 40 pipeline that conveys water to the stock tanks. A total of eight stock tanks will be included in the system. Seven stock tanks are located in Sections 2, 3, and 4 of T21N, R15E and another existing stock tank is located in Section 33 T22N, R15E.**

6. Agencies consulted during preparation of the Environmental Assessment:  
(include agencies with overlapping jurisdiction)

**Dept. of Environmental Quality Website – Clean Water Act Information Center  
MT. National Heritage Program Website - Species of Concern  
USDI Fish & Wildlife Service Website - Endangered and Threatened Species  
MT State Historic Preservation Office - Archeological/Historical Sites  
USDA Natural Resources Conservation Service – Web Soil Survey  
USDI Fish & Wildlife Service – Wetlands Online Mapper**

**Part II. Environmental Review**

1. Environmental Impact Checklist:

**PHYSICAL ENVIRONMENT**

## **WATER QUANTITY, QUALITY AND DISTRIBUTION**

**Water quantity** - Assess whether the source of supply is identified as a chronically or periodically dewatered stream by DFWP. Assess whether the proposed use will worsen the already dewatered condition.

*Determination:*           **No Significant Impact.**

**The source of supply for this application is groundwater; therefore, it has not been identified as a chronically or periodically dewatered stream by DFWP. There is a low likelihood that this project will have a significant impact on water quantity; demands on the hydrologic system are not expected to change.**

**Water quality** - Assess whether the stream is listed as water quality impaired or threatened by DEQ, and whether the proposed project will affect water quality.

*Determination:*           **No Significant Impact.**

**This change is to add seven stock tanks to an existing Statement of Claim 41S 132042 for a well (Morris Well). As such, the source has not been listed as a water quality impaired or threatened stream by DEQ. There is a low likelihood that the new tanks will have a significant impact on water quality, the tanks will be located away from the source of supply.**

**Groundwater** - Assess if the proposed project impacts ground water quality or supply. If this is a groundwater appropriation, assess if it could impact adjacent surface water flows.

*Determination:*           **No Significant Impact.**

**This project is not anticipated to use any more groundwater than has been used historically. The flow rate for the Statement of Claim will be 8 GPM and will service the same number of animal units, 400.**

**DIVERSION WORKS** - Assess whether the means of diversion, construction and operation of the appropriation works of the proposed project will impact any of the following: channel impacts, flow modifications, barriers, riparian areas, dams, well construction.

*Determination:*           **No Significant Impact.**

**The Applicant is adding stock tanks to an existing system. The source of water is a well that conveys approximately 8 GPM in a five mile long pipeline. The stock tanks have a float valve system installed and water diversion will stop when the tanks are full. The diversion works are already in place; therefore no impacts that haven't already occurred are anticipated. Channel impacts, impacts to flow modifications, barriers, riparian areas, dams, or well construction are not anticipated.**

## **UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES**

**Endangered and threatened species** - Assess whether the proposed project will impact any threatened or endangered fish, wildlife, plants or aquatic species or any “species of special concern,” or create a barrier to the migration or movement of fish or wildlife. For groundwater, assess whether the proposed project, including impacts on adjacent surface flows, would impact any threatened or endangered species or “species of special concern.”

Determination:           **No Significant Impact.**

The Montana National Heritage Program lists 15 Species of Concern and one plant Species of Concern (Square-stem Monkeyflower) within Township 21 and 22 North, Range 15 East. The common names for the species include the Little Brown Myotis, Townsend's Big-eared Bat, Golden Eagle, Hoary Bat, Great Blue Heron, Greater Sage Grouse, Burrowing Owl, Spiny Softshell, Black-Tailed Prairie Dog, Sauger, Pallid Sturgeon, Sicklefin Chub, Paddle Fish, Sturgeon Chub and the Blue Sucker. All construction associated with this permit is complete and the place of use has been previously disturbed by grazing practices; no impacts to any of these species are expected. The USDI Fish & Wildlife Service Website also lists the Canada Lynx as threatened and the Black Footed Ferret as an endangered species.

**Wetlands** - Consult and assess whether the apparent wetland is a functional wetland (according to COE definitions), and whether the wetland resource would be impacted.

Determination:           **No Significant Impact.**

The National Wetlands Inventory website shows Freshwater Emergent Type Wetlands through a limited portion of the Applicant’s claimed places of use. No significant impacts to wetlands are expected from this change application. The wetlands may benefit from the cattle watering away from any riparian areas.

**Ponds** - For ponds, consult and assess whether existing wildlife, waterfowl, or fisheries resources would be impacted.

Determination:           **No Significant Impact.**

This project does not involve a pond. No impact to wildlife, waterfowl, or fisheries is anticipated.

**GEOLOGY/SOIL QUALITY, STABILITY AND MOISTURE** - Assess whether there will be degradation of soil quality, alteration of soil stability, or moisture content. Assess whether the soils are heavy in salts that could cause saline seep.

Determination:           **No Significant Impact.**

Potential cumulative impacts associated with the construction activities could have created a minor impact on the soils on the places of use, but construction is complete and there will be no further impacts than what has already occurred. It is not anticipated that any significant impacts to geology, soil quality, stability and moisture would result from the

proposed action because this project is simply to add stock water tanks to an existing system, and the project has already been completed.

**VEGETATION COVER, QUANTITY AND QUALITY/NOXIOUS WEEDS** - *Assess impacts to existing vegetative cover. Assess whether the proposed project would result in the establishment or spread of noxious weeds.*

*Determination:*           **No Significant Impact.**

Construction associated to this project was completed prior to this application. Any impacts to existing cover will have already occurred. Normal weed management can be used to control noxious weeds potentially invading disturbed areas due to construction activities; therefore, no spread of noxious weeds should be associated with this application. It is the responsibility of the property owner to control noxious weeds on their property.

**AIR QUALITY** - *Assess whether there will be a deterioration of air quality or adverse effects on vegetation due to increased air pollutants.*

*Determination:*           **No Significant Impact.**

No impacts to air quality or adverse effects to vegetation are expected as a result of this proposal; the pump is an electric power motor.

**HISTORICAL AND ARCHEOLOGICAL SITES** - *Assess whether there will be degradation of unique archeological or historical sites in the vicinity of the proposed project.*

*Determination:*           **N/A – project not located on State or Federal Lands.**

**DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AND ENERGY** - *Assess any other impacts on environmental resources of land, water and energy not already addressed.*

*Determination:*           **No Significant Impact.**

No additional impacts are anticipated.

<b>HUMAN ENVIRONMENT</b>
--------------------------

**LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS** - *Assess whether the proposed project is inconsistent with any locally adopted environmental plans and goals.*

*Determination:*           **No Significant Impact.**

No locally adopted environmental plans or goals have been identified.

**ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES** - *Assess whether the proposed project will impact access to or the quality of recreational and wilderness activities.*

*Determination:*           **No Significant Impact.**

**The proposed action is consistent with livestock practices in the area.**

**HUMAN HEALTH** - *Assess whether the proposed project impacts on human health.*

*Determination:*           **No Significant Impact.**

**No impacts to human health have been identified.**

**PRIVATE PROPERTY** - *Assess whether there are any government regulatory impacts on private property rights.*

*Yes\_\_\_ No\_X\_\_ If yes, analyze any alternatives considered that could reduce, minimize, or eliminate the regulation of private property rights.*

*Determination:* **No known impacts.**

**OTHER HUMAN ENVIRONMENTAL ISSUES** - *For routine actions of limited environmental impact, the following may be addressed in a checklist fashion.*

*Impacts on:*

- (a) Cultural uniqueness and diversity?   **None**
- (b) Local and state tax base and tax revenues?   **None**
- (c) Existing land uses?   **No significant impact from the additional stock tanks.**
- (d) Quantity and distribution of employment?   **None**
- (e) Distribution and density of population and housing?   **None**
- (f) Demands for government services?   **None**
- (g) Industrial and commercial activity?   **None**
- (h) Utilities?   **None**
- (i) Transportation?   **None**
- (j) Safety?   **None**
- (k) Other appropriate social and economic circumstances?   **None**

2.     *Secondary and cumulative impacts on the physical environment and human population:*

Secondary Impacts : **No secondary impacts have been identified.**

Cumulative Impacts: **No cumulative impacts have been identified.**

3. *Describe any mitigation/stipulation measures:*

**No mitigation or stipulation measures have been identified by the Applicant.**

4. *Description and analysis of reasonable alternatives to the proposed action, including the no action alternative, if an alternative is reasonably available and prudent to consider:*

**No action alternative: Deny the application. This alternative would result in no change to the existing water rights for irrigation.**

### *PART III. Conclusion*

#### **1. Preferred Alternative**

The preferred alternative is the proposed alternative.

#### **2 Comments and Responses**

None Received.

#### **3. Finding:**

Yes\_\_\_ No **X** Based on the significance criteria evaluated in this EA, is an EIS required?

*If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:*

**None of the identified impacts for any of the alternatives are significant as defined in ARM 36.2.524.**

*Name of person(s) responsible for preparation of EA:*

Name: Michael Everett
